Mission Statement

&

Environment Policy

We exist as a business to inspire designers with authentic, cost-effective materials for design, that are kind to people, the planet and animals.

Our materials have a special focus on bringing wellness to workplaces and hospitality environments.

We are fully committed to continual improvement to enhance our environmental performance across the whole of our business, through constant review.

We endeavour to protect and reduce our impact on the environment in all aspects of our business by sourcing locally, sustainably, and by recycling and reuse materials wherever practical and by using 100% renewable electricity in our workshop.

We comply with all environmental legislation and relevant codes of practice at all times.

Engagement with our team is at the core of our strategy.
